UNIT 1 · TOPIC 7(A)

Vegetable Crop Equipment

Syllabus topic: Special equipment for crops: vegetables, sugarcane, cotton, groundnut, potato and fruit crops

Seeding and transplanting

- **Precision seeders**, and precision (pneumatic/vacuum) planters, are used for vegetables.
- Stationary opening + agitator metering is used on vegetable seeders.
- **Vegetable transplanters (semi-automatic):** the operator feeds seedlings/plug seedlings into rotating cups or fingers. Automatic types need pro-tray (plug) seedlings.

Harvesting

- Onion/garlic diggers.
- Carrot harvesters (top-lifting).
