UNIT 1 · TOPIC 7(D)

Groundnut Equipment

Syllabus topic: Special equipment for crops: vegetables, sugarcane, cotton, groundnut, potato and fruit crops

Planting

- **Groundnut planter:** inclined-plate metering — low seed (kernel) damage.

Harvesting

1. A **digger-shaker/inverter** blade cuts the taproot below the pods.
2. It lifts and inverts the vines for field curing.
3. A **thresher/pod stripper** separates the pods.

Practice MCQs

Q32. Inclined-plate metering is preferred for groundnut because:

(a) Higher seed rate
(b) Minimum seed (kernel) damage
(c) Cheaper
(d) No calibration needed

Answers

Q32 — (b) Minimum seed (kernel) damage
